Pre-professional studies

uwinnipeg.ca/pre-professional

Pre-professional pathways prepare students for their professional program of choice. They can be used to fulfil the admission requirements for professional programs at other universities in Canada, the U.S., and around the world.

Direct-entry pathways

Students in Canada do not begin studies related to many popular professions, including medicine, law and dentistry, directly from high school. These programs require several years of undergraduate coursework before students are eligible to apply.

While completion of a UWinnipeg pre-professional program does not guarantee admission into a professional faculty, you will benefit from our small class sizes, personalized instruction, and state-of-the-art science facilities.

Students must be aware of restrictions international students may face with admissions to professional programs, and they should do their own research on professional schools (which ones accept international students and their entrance requirements) prior to applying or beginning any of these programs. Many of our pre-professional studies lead to a bachelor's degree, which will offer flexibility and options for graduates.
